It has been just over a decade since I first stepped into the campus, yet the memory seems so fresh, and in between Fresher's and Farewell, life happened.

My teachers, Office Staff, Fellow Classmates have played a major role in molding me to where I am today. The dedication of the faculty, the love and care they shower upon the students is something that is extremely commendable.

Special mention goes to Mrs. Pallavi Bhatt who continues to teach to this day with the same love and enthusiasm towards her students. When my students appreciate my work, all the credit goes to her!

Some of my closest friends in life today are those I met in my years at M.S Ramaiah PU College. Once you finish High School, the time spent in Pre-University is like the first step into adulthood & responsibility. In hindsight, the two years went by a little too quickly for me but I'm grateful for my time at MSRPU. The experience has molded me into the person I am today. Whether it is my involvement in the many (all) cultural activities that influenced my career or the classroom memories with my old friends and teachers that define my human values, the days in college are those I will fondly look back as I'm ageing out.

The activity conducted on Saturday (21/12/2019), about the “Geometry in monuments”, was really very helpful. While deciding the monument it was very necessary to go through about all the monuments, so we could get information about all the monuments .We could even get to know the importance of mathematics in construction of building .Overall, it would be really helpful, if we have it even in the second year.
