## BIO RANGOLI

"A Creative Expression of Biological Concepts Through Traditional Art"

The Department of Biology at **Ramaiah Pre-University College** organized a unique and creative event titled "**Bio Rangoli**", aimed at combining scientific learning with artistic expression. This event was held on 30<sup>th</sup> August 2025. The students drew rangoli designs based on diagrams from their Biology textbooks, creatively representing key Biological structures and processes.

Participants from both 1<sup>st</sup> PUC and 2<sup>nd</sup> PUC enthusiastically took part, turning the classroom concepts into vibrant and meaningful rangoli artwork. The rangoli designs beautifully brought biology to life, featuring intricate illustrations of the human brain, plant cells, neurons, the female reproductive system, developing embryos, and more.

The main objective of the event was to encourage students to visualize and internalize biological concepts. It promoted deeper learning, creativity, and teamwork, while also highlighting the interdisciplinary connection between science and art.
